4. COMMERCIAL CUSTOM EFFICIENCY REBATE PROGRAM APPLICATION WORKSHEET (please print)

This worksheet is designed to summarize the proposed custom project including equipment, costs, savings, and calculate the potential rebate. The data contained, or attached, with this application must be sufficient to verify the demand and energy reductions described and must include; all assumptions, hours of use, consideration of measure interaction (if appropriate), consideration of equipment loading, description of models used (e.g. DOE-2, TRACE, ASEAM, BLAST, etc.), complete description of equipment involved, and the intended operating strategy. Attach additional materials as necessary. Note: Projects that involve switching from one fuel type to another (fuel switching) and projects eligible for existing prescriptive rebate programs are ineligible for a custom rebate. See Terms & Conditions for details.

SECTION B: ANNUAL ENERGY SAVINGS

Please enter the operating characteristics of the equipment associated with the proposed project. All assumptions made in completing this section must be described. Attach additional materials as necessary.

Month	Operating Ch Before Plan	naracteristics ned Measure	Operating Characteristics After Planned Measure		Monthly kW Savings	Monthly kWh Savings

	FIRST-YEAR ANNUAL ENERGY SAVINGS (kWh):					

SECTION C: ANNUAL BILL SAVINGS

Use the monthly demand and energy savings from columns E & F in SECTION B and apply your demand and energy charge to estimate the monthly and annual bill savings associated with this project. Monthly demand and energy rates should be available on your bill. Rates in certain classes may vary by season. If you have difficulty in identifying your demand and energy rates, please contact your local utility.

Month	A Monthly kW Savings (Column E from SECTION B)	B Monthly Demand Rate (\$/kW)	C Monthly Demand Savings (A x B)	D Monthly kWh Savings (Column F from SECTION B)	E Monthly Energy Rate (\$/kWh)	F Monthly Energy Savings (D x E)	G Monthly Bill Savings (C + F)

5. TERMS AND CONDITIONS

ELIGIBILITY 1.

Rebates are available to non-residential electric customers of Austin Utilities, Owatonna Public Utilities, and Rochester Public Utilities (herein referred to as The Utility). Projects eligible under existing prescriptive rebate programs are not eligible to receive a custom rebate. Projects that involve switching from one fuel type to another (fuel switching) are not eligible. Projects where the energy savings result from reduced production, change in operating hours, or equipment retirement are not eligible. All equipment must be new and in use in The Utility service territory.

APPLICATION

Program is offered January 1 through December 31 of the respective calendar year. Due to limited funding, this rebate offer can be changed or withdrawn at any time without notice and is available on a first-come, first-serve basis. The entire rebate application must be read and filled out completely or application will be returned. Data contained in the application or attached materials must be sufficient to verify the costs and the demand (kW) and energy savings (kWh) described in the application. The utility reserves the right to perform an independent evaluation to confirm savings at the customer's expense.

INSPECTION AND VERIFICATION

The Utility reserves the right to inspect the customer's facility through on-site visits before and after new equipment installation to verify rebate eligibility. The Utility also reserves the right to perform pre- and post-installation monitoring of the installed measure in order to determine actual demand (kW) reduction and energy (kWh) savings.

INSTALLATION AND REBATE AMOUNTS

Qualifying energy-efficient equipment installed and operational within six (6) months of the date of purchase are eligible for rebate. Additional time may be granted subject to The Utility's pre-approval. Custom rebates are based on the first-year annual energy savings determined in Section B. In no case will the rebate paid by The Utility exceed the total project cost (for projects that retrofit or replace working equipment) or the incremental project cost (for all other project types). The maximum rebate amount is \$100,000 per customer location per technology per year. The Utility can, at its sole discretion, increase rebate amounts.

INVOICE AND PAYMENT

Following inspection and verification (see #3) and completed installation, the customer must notify The Utility and submit original invoices specifying the quantity and price of all materials purchased including equipment discounts, the date ordered, installation costs, and applicable taxes. After satisfactory review of the application and invoices, a rebate check or bill credit will be issued to the customer. Please allow 6-10 weeks from the date of application submission for delivery of rebate check or bill credit.

EQUIPMENT ELIGIBILITY REQUIREMENTS

To be eligible for a rebate, all equipment to be purchased as part of the custom measure shall include documentation as to the type, make, model, and efficiency. This may require documentation of nameplate data and/or applicable test data.

TAX INFORMATION

The Utility will not be responsible for any tax liability imposed as a result of the rebate payment(s). Customers are advised to consult their tax advisors for details.

DISCLAIMER

The Utility does not guarantee that the implementation of energy-efficient measures or use of the equipment purchased or installed pursuant to this program will result in energy or cost savings. The Utility makes no warranties, expressed or implied, with respect to any equipment purchased or installed including, but not limited to, any warrant of merchantability or fitness for purpose. In no event shall The Utility be liable for any incidental or consequential damages. Customers are solely responsible for the proper disposal of existing equipment. Consult the Minnesota Pollution Control Agency (MPCA) office for details at (800) 657-3864.

ENDORSEMENT

The Utility does not endorse any particular vendor, manufacturer, product, or system in promoting this rebate program. Listing a vendor or product does not constitute an endorsement, nor does it imply that unlisted vendors or products are deficient or defective in any way.

10. PRIVACY

Information contained in this rebate application may be shared with the Minnesota Department of Commerce and our co-op partners and also may be used in our advertising efforts with your permission as granted in Section 2 of this rebate application.
