RPU'S NEW RAIN BARREL REBATE

Start living "greener" and conserving water with RPU's new rain barrel rebate. With the new rain barrel rebate program, customers can receive a \$10 rebate on a qualifying rain barrel that is purchased or built.

Rain barrels collect and store rain water runoff from the roof of your house when it rains. The collected water can then be used to water gardens, plants, and trees. The uses of a rain barrel can also help lower your monthly water bill and help with groundwater recharge. It is estimated that over 40 percent of water usage in the summer is used outside of the house.

RPU residential customer's average daily household water usage is 140 gallons per day.

Download the rain barrel rebate application and get installation instructions on the RPU web site at www.rpu.org.

CAN YOU BELIEVE IT?

ONE INCH OF RAIN ON A 1,000 SQUARE FOOT ROOF CAN YIELD UP TO 625 GALLONS OF WATER!

Our mission is to consistently increase the value of the electricity, water and related utility services that we offer to our customers and to help them realize the best value from the services they receive.
