SECTION K. TERMS AND CONDITIONS

1. ELIGIBILITY

Rebates are available to non-residential customers of Rochester Public Utilities (RPU). All products must be in use in facilities in RPU's service territory. The applicant shall be an end-user (i.e., not a motor wholesaler, distributor, or installer) of either commercial or industrial motors.

2. APPLICATION

Program is offered January 1 through December 31 of the respective calendar year. **Due to limited funding, this rebate offer can be changed or withdrawn at any time without notice and is available on a first-come, first-served basis.** All projects must be pre-approved by RPU to qualify for a rebate. The entire rebate application must be read and filled out completely or the application will be returned.

3. INSPECTION AND VERIFICATION

RPU reserves the right to inspect the customer's facility through on-site visits before and after new equipment installation or inventory to verify rebate eligibility. RPU reminds you to follow all local permitting and building code ordinances.

4. INSTALLATION AND REBATE AMOUNTS

Qualifying energy-efficient equipment installed and operational within six (6) months of the date of purchase are eligible for rebate. Additional time may be granted subject to RPU's pre-approval. In no case will the rebate paid by RPU exceed the purchase price of the equipment. The maximum rebate amount is \$100,000 per customer location per technology per year.

5. INVOICE AND PAYMENT

Following inspection and verification (see #3) and completed installation, the customer must notify RPU and submit original invoices specifying the model number, quantity and price of all materials purchased, the date ordered, installation costs, and applicable taxes. After satisfactory review of the invoices and on-site verification, a rebate check will be issued to the Customer. Vendors or contractors are not eligible to receive the rebate. Please allow 6–10 weeks from the date of on-site inspection for delivery of payment. RPU reserves the right to apply rebates to past due accounts.

6. EQUIPMENT ELIGIBILITY REQUIREMENTS

ECM Evaporator Fan Motors in Refrigerated Cases: Eligible motors must be new electronically commutated motors (ECM). For retrofit projects, new ECM motors must replace existing shaded pole or permanent split capacitor evaporator fan motors. Removed fan motors must not be reused within RPU's service territory. Rebates are not available for ECM motors in new walk-in coolers or freezers.

ECM Motors on Refrigeration Condenser Fans: Eligible motors must be new electronically commutated motors (ECM). For retrofit projects, new ECM motors must replace existing shaded pole or permanent split capacitor evaporator motors. Removed fan motors must not be re-used within RPU's service territory.

Floating Head Pressure Controls: Applicable to refrigeration systems without existing floating head pressure controls. New controller must be installed. Projects that only reprogram an existing controller are not eligible for this rebate. Controls must vary head pressure to automatically adjust condensing temperature in relation to the outdoor air temperature. Condensing temperature must be set to 70°F or lower.

Anti-Sweat Heater Controls: Technologies must reduce the energy consumption of the anti-sweat heaters by sensing the relative humidity in the air outside of the display case (Humidity-Based) or by sensing condensation on the inner glass pane of the display case doors (Conductivity-Based). Controls must automatically reduce the energy consumption of the anti-sweat heaters by at least 50%.

Add Doors to Open Multi-Deck Cases: Retrofit projects only. New doors must be added to existing open multi-deck refrigerated cases. Project must include enclosing the ends of the case.

Efficient Multi-Deck Case Doors: Qualifying project types are replacing existing inefficient doors and new cooler/freezer case installations. Qualifying new no-heat or low-heat clear glass doors must be installed on a multi-deck display case. Qualifying new doors must meet the qualifying wattages listed. Wattage includes glass, frame, and mullion heaters.

Walk-In Freezer Electric Demand Defrost Controls: Rebate applies to controls on walk-in freezers with electric defrost. Evaporator coil temperature and pressure must be monitored by controller to optimize defrost cycles.

7. TAX INFORMATION

RPU will not be responsible for any tax liability imposed as a result of the rebate payment(s). Customers are advised to consult their tax advisors for details.

8. DISCLAIMER

RPU does not guarantee that the implementation of energy-efficient measures or use of the equipment purchased or installed pursuant to this program will result in energy or cost savings. RPU makes no warranties, expressed or implied, with respect to any equipment purchased or installed including, but not limited to, any warrant of merchantability or fitness for purpose. In no event shall RPU be liable for any incidental or consequential damages. Customers are solely responsible for the proper disposal of existing equipment. Consult the Minnesota Pollution Control Agency (MPCA) office for details at 800-657-3864.

9. ENDORSEMENT

RPU does not endorse any particular vendor, manufacturer, product, or system in promoting this rebate program. Listing a vendor or product does not constitute an endorsement, nor does it imply that unlisted vendors or products are deficient or defective in any way.

10. PRIVACY

Information contained in this rebate application may be shared with the Minnesota Department of Commerce and our co-op partners and also may be used in our advertising efforts with your permission as granted in Section B of this rebate application.

11. APPLICATION SUBMISSION

Submit completed forms and required documentation to RPU.
