# RESIDENTIAL SERVICE

## AVAILABILITY:

At all locations where facilities of adequate capacity and suitable voltage are adjacent to the premises to be served. Where service desired by the customer is not adjacent to the premises to be served, additional contract arrangements may be required prior to service being furnished.

## APPLICATION:

To electric service required for residential purposes in individual private dwellings and in individually metered apartments when such service is supplied at one point of delivery and measured through one meter. Existing single metered, multi-unit dwellings having not in excess of three separate dwelling units in the same structure may be served under this rate.

## CHARACTER OF SERVICE:

Single phase, 60 Hertz, 120/240 volts alternating current

<b>RATE</b>	<b>2026</b>	<b>2027</b>
Customer Charge	\$24.44	\$26.00
Energy Charge (kWh) Non-Summer	\$0.12619	\$0.13483
Energy Charge (kWh) Summer	\$0.15074	\$0.16108

## DEFINITION OF SEASON:

- Summer months are June through September.
- Non-summer months are January through May and October through December.

## POWER COST ADJUSTMENT:

Bills computed under this rate schedule are subject to adjustment in accordance with the Power Cost Adjustment (PCA).

## MINIMUM BILL PER MONTH:

<b>2026</b>	<b>2027</b>
\$24.44	\$26.00

**PAYMENTS:**

Payments are due on or before the due date.

**CONDITIONS OF DELIVERY:**

1. Service furnished under this rate schedule is subject to applicable provisions of RPU's published Electric Service Rules and Regulations.
2. RPU shall not be liable for any damage or loss sustained by customers resulting from interruptions, deficiencies, or imperfections of service provided under this rate.
3. Energy furnished under this rate shall not be resold.
4. This tariff assumes use of metering technology capable of being read using automated equipment.

# RESIDENTIAL SERVICE DUAL FUEL – Closed

## AVAILABILITY:

Available only to existing dual fuel customers transferred from People's Energy Cooperative electrical system to RPU's system as part of RPU's electric service territory acquisitions and are currently on the Residential Service Dual Fuel rate as of January 1, 2022.

## APPLICATION:

To electric heating service required for residential purposes in individual private buildings. Such electric heating load shall be metered separately from the rest of the service

## CHARACTER OF SERVICE:

Single phase, 60 Hertz, 120/240 volts alternating current

## RATE:

Energy Charge per kWh

2026	2027
\$0.09419	\$0.10065

## MINIMUM BILL:

Energy usage.

## PAYMENT:

Payments are due on or before the due date.

## CONDITIONS OF DELIVERY:

1. Service under this rate is only for electric heating. All other electrical loads shall be metered under the RES residential service rate.
2. Customer must keep his or her alternate fuel source heating system in satisfactory operating condition.
3. RPU reserves the right to transfer RES-DF customers from the primary electric heat source to the alternate fuel source at any such time that the electric heating load would add to RPU's monthly electric peak.
4. Customers that remove existing dual fuel heating systems shall not be eligible for the RES-DF rate with replacement heating systems.
5. Service furnished under this rate schedule is subject to applicable provisions of RPU's published Electric Service Rules and Regulations.
6. RPU shall not be liable for any damage or loss sustained by customers resulting from interruptions, deficiencies, or imperfections of service provided under this rate.

7. Energy furnished under this rate shall not be resold.
8. This tariff assumes use of metering technology capable of being read using automated equipment.

# RESIDENTIAL SERVICE HIGH EFFICIENCY HVAC-Closed

## AVAILABILITY:

To RPU residential customers that:

1. Are currently on the Residential Service-High Efficiency HVAC rate as of January 1, 2022.
2. Use either an air source or ground source heat pump system as the only source of heating and cooling in their home.
3. Use an electric water heater (usually connected to a desuperheater on the heat pump) as their only source of domestic water heating.
4. Receive prior approval of the equipment from RPU. Note that equipment must be rated by the Air-Conditioning, Heating, and Refrigeration Institute (AHRI)\*, and at the time of installation, meet the minimum efficiency requirements found on the Residential Electric Efficiency Rebate Application in effect at the time. The current application is available on [RPU's website](#).

For air source and ground source heat pumps the efficiency ratings are determined using the Air-Conditioning, Heating, and Refrigeration Institute's (AHRI) directory, which may be found at [AHRI directory](#).

## APPLICATION:

Electric service required for residential purposes in individual private dwellings where service is supplied at one point of delivery and measured through one meter.

## CHARACTER OF SERVICE:

Single phase, 60 hertz, 120/240 volts alternating current

## RATE:

RATE	2026	2027
Customer Charge	\$24.44	\$26.00
Energy Charge Non-Summer first 600 kWh	\$0.12619	\$0.13483
Energy Charge Non-Summer over 600 kWh	\$0.10575	\$0.13483
Summer kWh	\$0.15074	\$0.16108

## DEFINITION OF SEASON:

- Summer months are June through September.
- Non-summer months are January through May and October through December.

**POWER COST ADJUSTMENT:**

Bills computed under this rate schedule are subject to adjustment in accordance with the Power Cost Adjustment (PCA).

**MINIMUM BILL PER MONTH:**

<b>2026</b>	<b>2027</b>
\$24.44	\$26.00

**PAYMENTS:**

Payments are due on or before the due date.

**CONDITIONS OF DELIVERY:**

1. Service under this rate is only for air-source or ground-source heat pump systems that meet the stated efficiency requirements as explained in the Availability subhead of this rate schedule.
2. Service provided under this rate is subject to applicable provisions of RPU's published Electric Service Rules and Regulations.
3. Energy provided under this rate shall not be resold.
4. RPU shall not be liable for any damage or loss sustained by customers resulting from interruptions, deficiencies, or imperfections of service provided under this rate.
5. This tariff assumes use of metering technology capable of being read using automated equipment

## RESIDENTIAL TIME-OF-USE

### AVAILABILITY:

At all locations where facilities of adequate capacity and suitable voltage are adjacent to the premises to be served. Where service desired by the customer is not adjacent to the premises to be served, additional contract arrangements may be required prior to service being furnished. RPU reserves the right to limit both the number of customers and the amount of load taken under this rate schedule.

### APPLICATION:

To electric service required for residential purposes in individual private dwellings and in individually metered apartments when such service is supplied at one point of delivery and measured through one meter

### CHARACTER OF SERVICE:

Single phase, 60 Hertz, 120/240 volts alternating current.

### RATE:

<b>RATE – Energy Charge (kWh)</b>	<b>2026</b>	<b>2027</b>
Customer Charge	\$24.44	\$26.00
Non-Summer Super-Peak	\$0.16366	\$0.17489
Non-Summer On-Peak	\$0.16366	\$0.17489
Non-Summer Off-Peak	\$0.08295	\$0.08864
Summer Super-Peak	\$0.33885	\$0.36208
Summer On-Peak	\$0.20154	\$0.21536
Summer Off-Peak	\$0.08295	\$0.08864

### DEFINITION OF SEASON:

- Summer months are June through September.
- Non-summer months are January through May and October through December

### DEFINITION OF SUPER-PEAK ENERGY

All energy used by the customer between the hours of 4:00 p.m. and 8:00 p.m. (4 Hours) Monday through Friday.

### DEFINITION OF ON-PEAK ENERGY

All energy used by the customer between the hours of 8:00 a.m. and 4:00 p.m. (8 hours) and between the hours of 8:00 p.m. and 10:00 p.m. (2 hours) Monday through Friday.

**DEFINITION OF OFF-PEAK ENERGY**

All energy used by the customer for all other hours, including weekends and specified holidays.

Off-Peak Holidays include New Years, Memorial Day, Independence Day, Labor Day, Thanksgiving, and Christmas Day.

**POWER COST ADJUSTMENT:**

Bills computed under this rate schedule are subject to adjustment in accordance with the Power Cost Adjustment (PCA).

**MINIMUM BILL PER MONTH:**

<b>2026</b>	<b>2027</b>
\$24.44	\$26.00

**PAYMENTS:**

Payments are due on or before the due date.

**DISTRIBUTED ENERGY RESOURCES**

Customers who have installed Distributed Energy Resources and have elected to receive the average retail utility rate are eligible to participate in the Residential Time-of-Use rate. All energy supplied by the customer’s qualifying facility will be purchased by RPU at the Residential Average Retail Rate as listed in Schedule 1 of the Rules Governing the Interconnection of Cogeneration and Small Power Production Facilities with Rochester Public Utilities. Schedule 1 is updated annually and can be found on [RPU’s website](#).

**CONDITIONS OF DELIVERY**

1. Service furnished under this rate schedule is subject to applicable provisions of RPU's published Electric Service Rules and Regulations.
2. RPU shall not be liable for any damage or loss sustained by customers resulting from interruptions, deficiencies, or imperfections of service provided under this rate.
3. Energy furnished under this rate shall not be resold.
4. Service under this rate will be made available at the option of the residential service customer, subject to the availability of the necessary time-of-use metering equipment.
5. A customer may switch to the RESIDENTIAL SERVICE rate providing the customer gives RPU at 45 days’ notice.
6. A customer may only switch from RESIDENTIAL SERVICE to RESIDENTIAL TIME-OF-USE rate one time.

7. This tariff requires the use of metering technology capable of being read using automated equipment.

## GENERAL SERVICE

### AVAILABILITY:

At all locations for loads of less than 25 kW where facilities of adequate capacity and suitable voltage are adjacent to the premises to be served. For loads where the service desired by the customer is not adjacent to the premises to be served, additional contract arrangements may be required prior to service being furnished.

### APPLICATION:

To commercial, industrial, governmental, and other types of General Service customers with all service taken at one point and measured through one meter. Also applicable to temporary service in accordance with RPU's published Electric Service Rules and Regulations. Not applicable to standby service.

### CHARACTER OF SERVICE:

Single or three phase, 60 Hertz, alternating current at any one of the standard secondary service voltages as described in RPU's published Electric Service Rules and Regulations.

### RATE:

RATE	2026	2027
Customer Charge	\$27.00	\$26.00
Energy Charge (kWh) Non-Summer	\$0.12861	\$0.13913
Energy Charge (kWh)	\$0.16552	\$0.17904

### DEFINITION OF SEASON:

- Summer months are June through September.
- Non-summer months are January through May and October through December.

### POWER COST ADJUSTMENT:

Bills computed under this rate schedule are subject to adjustment in accordance with the Power Cost Adjustment (PCA).

### MINIMUM BILL PER MONTH:

2026	2027
\$27.00	\$26.00

**PAYMENTS:**

Payments are due on or before the due date.

**CONDITIONS OF DELIVERY:**

1. Service furnished under this rate schedule is subject to applicable provisions of RPU's published Electric Service Rules and Regulations.
2. Unless authorized by separate written agreement, standby electric generating equipment installed by the customer shall not be interconnected, or operated in parallel, with the RPU system. Customer shall own, install, operate, and maintain electrical interlocking equipment, which will prevent parallel operation, and such equipment shall be approved by RPU prior to installation.
3. RPU shall not be liable for any damage or loss sustained by customers resulting from interruptions, deficiencies, or imperfections of service provided under this rate.
4. Energy furnished under this rate shall not be resold.
5. This tariff assumes use of metering technology capable of being read using automated equipment.

# GENERAL SERVICE HIGH EFFICIENCY HVAC – Closed

## AVAILABILITY:

At all locations for loads of less than 25 kW where facilities of adequate capacity and suitable voltage are adjacent to the premises to be served and to customers who:

1. Are currently on the General Service High Efficiency HVAC rate as of January 1, 2022.
2. Use either an air source or ground source heat pump system as the only source of heating and cooling in their facility.
3. Use an electric water heater (usually connected to a desuperheater on the heat pump) as the only source of water heating.
4. Receive prior approval of the equipment from RPU. Note that equipment must be rated by the Air-Conditioning, Heating, and Refrigeration Institute (AHRI)\* and at the time of installation, meet the minimum efficiency requirements found on the Commercial Heat Pumps Rebate Application in effect at the time. The current application is available on [RPU's website](#).
5. Service under this rate must be separately metered from other facility loads.

\*For air source and ground source heat pumps the efficiency ratings are determined using the Air-Conditioning, Heating and Refrigeration Institute's (AHRI) directory, which may be found on the [AHRI Directory](#) website. Note: Other all-electric HVAC systems may be considered for this rate if they meet the stated efficiency standards. To have a system considered, customers must submit an engineering analysis documenting the efficiency of the system.

## APPLICATION:

To commercial, industrial, governmental, and other types of General Service customers currently receiving their service through this rate as of January 1, 2022. Not applicable to standby service.

## CHARACTER OF SERVICE:

Single or three phase, 60 Hertz, alternating current at any one of the standard secondary service voltages as described in RPU's published Electric Service Rules and Regulations.

## RATE:

<b>RATE</b>	<b>2026</b>	<b>2027</b>
Customer Charge	\$27.00	\$26.00
Energy Charge (kWh) Non-Summer	\$0.10730	\$0.11608
Summer	\$0.16555	\$0.17909

**DEFINITION OF SEASON:**

- Summer months are June through September.
- Non-summer months are January through May and October through December.

**POWER COST ADJUSTMENT:**

Bills computed under this rate schedule are subject to adjustment in accordance with the Power Cost Adjustment (PCA).

<b>2026</b>	<b>2027</b>
\$27.00	\$26.00

**PAYMENTS:**

Payments are due on or before the due date.

**CONDITIONS OF DELIVERY:**

1. Service under this rate is only for air source or ground source heat pumps and any other all-electric systems that meet the stated efficiency requirements as explained in the Availability subhead of this rate schedule.
2. Service under this rate must be separately metered from other facility loads.
3. Since the HVAC system must be separately metered for this rate, the customer is responsible for any rewiring and its associated costs.
4. Service provided under this rate is subject to applicable provisions of RPU’s published Electric Service Rules and Regulations.
5. Energy provided under this rate shall not be resold.
6. RPU shall not be liable for any damage or loss sustained by customers resulting from interruptions, deficiencies, or imperfections of service provided under this rate.
7. Unless authorized by a separate written agreement, standby electric generating equipment installed by the customer shall not be interconnected, or operated in parallel, with the RPU system. Customer shall own, install, operate, and maintain electrical interlocking equipment, which will prevent parallel operation, and such equipment shall be approved by RPU prior to installation.
8. This tariff assumes use of metering technology capable of being read using automated equipment.

# GENERAL SERVICE TIME-OF-USE

## AVAILABILITY:

At all locations for loads of less than 25 kW where facilities of adequate capacity and suitable voltage are adjacent to the premises to be served. For loads where the service desired by the customer is not adjacent to the premises to be served, additional contract arrangements may be required prior to service being furnished. RPU reserves the right to limit both the number of customers and the amount of load taken under this rate schedule.

## APPLICATION:

To commercial, industrial, governmental, and other types of General Service customers with all service taken at one point and measured through one meter. All electrical requirements at one location shall be taken under this rate schedule. Not applicable to temporary or standby service.

## CHARACTER OF SERVICE:

Single or three phase, 60 Hertz, alternating current at any one of the standard secondary service voltages as described in RPU's published Electric Service Rules and Regulations.

## RATE:

<b>RATE – Energy Charge (kWh)</b>	<b>2026</b>	<b>2027</b>
Customer Charge	\$27.00	\$26.00
Non-Summer On-Peak	\$0.22287	\$0.24145
Non-Summer Off-Peak	\$0.07651	\$0.08276
Summer On-Peak	\$0.27816	\$0.30089
Summer Off-Peak	\$0.08109	\$0.08772

## DEFINITION OF SEASON:

- Summer months are June through September.
- Non-summer months are January through May and October through December

## DEFINITION OF ON-PEAK ENERGY

All energy used by the customer between the hours of 8:00 a.m. and 4:00 p.m. (8 hours) and between the hours of 8:00 p.m. and 10:00 p.m. (2 hours) Monday through Friday.

## DEFINITION OF OFF-PEAK ENERGY

All energy used by the customer for all other hours, including weekends and specified

holidays.

**OFF-PEAK HOLIDAYS:**

New Years, Memorial Day, Independence Day, Labor Day, Thanksgiving, and Christmas Day.

**CUSTOMER CHARGE:**

Customer Charge per month plus any additional meter charge for costs above RPU's standard GS meter costs.

**POWER COST ADJUSTMENT:**

Bills computed under this rate schedule are subject to adjustment in accordance with the Power Cost Adjustment (PCA).

**MINIMUM BILL PER MONTH:**

Customer Charge per month

**PAYMENTS:**

Payments are due on or before the due date.

**CONDITIONS OF DELIVERY:**

1. Service under this rate will be made available at the option of the general service customer, subject to the availability of the necessary time-of-use metering equipment.
2. Customers converting to the GS-TOU rate from the General Service (GS) rate shall make a one-time payment to RPU for any conversion cost above the normal cost to install GS-TOU metering.
3. A customer may switch back to the GS rate providing the customer gives RPU at least 60 days' notice and agrees to pay any metering conversion costs.
4. Service furnished under this rate schedule is subject to applicable provisions of RPU's published Electric Service Rules and Regulations.
5. Unless authorized by a separate written agreement, standby electric generating equipment installed by the customer shall not be interconnected, or operated in parallel, with the RPU system. Customer shall own, install, operate, and maintain electrical interlocking equipment, which will prevent parallel operation, and such equipment shall be approved by RPU prior to installation.
6. RPU shall not be liable for any damage or loss sustained by customers resulting from interruptions, deficiencies, or imperfections of service provided under this rate.
7. Energy furnished under this rate shall not be resold.
8. This tariff requires the use of metering technology capable of being read using automated equipment.

## **MEDIUM GENERAL SERVICE SECONDARY**

### **AVAILABILITY:**

At all locations for loads where the demand is at least 25 kW or more for three or more billing periods in a rolling 12-month period, but less than 10,000 kW, and where facilities of adequate capacity and suitable voltage are adjacent to the premises to be served. For loads where the service desired by the customer is not adjacent to the premises to be served, additional contract arrangements may be required prior to service being furnished.

### **APPLICATION:**

To commercial, industrial, and governmental customers taking delivery at a voltage compliant with RPU's published Electric Rules and Regulations, with all service taken at one point under 13.8 kV, and measured through one meter, including both Single and Three phase voltage. Also applicable to temporary service in accordance with RPU's published Electric Service Rules and Regulations. Not applicable to standby service.

### **CHARACTER OF SERVICE:**

Single or three phase, 60 Hertz, alternating current at any one of the standard secondary service voltages as described in RPU's published Electric Service Rules and Regulations.

### **RATE:**

<b>RATE</b>	<b>2026</b>	<b>2027</b>
Demand Charge (kW) Non-Summer	\$19.93	\$20.91
Demand Charge (kW) Summer	\$26.88	28.20
Energy Charge (kWh) Non-Summer	\$0.06733	\$0.07202
Energy Charge (kWh) Summer	\$0.06733	\$0.07202

### **DEFINITION OF SEASON:**

- Summer months are June through September.
- Non-summer months are January through May and October through December

### **POWER COST ADJUSTMENT:**

Bills computed under this rate schedule are subject to adjustment in accordance with the Power Cost Adjustment (PCA).

**POWER FACTOR ADJUSTMENT:**

The customer agrees to maintain an average power factor of 0.95 or greater for the billing period and to prevent a leading power factor. If the customer's average power factor is less than 0.95 for the billing period, the billing demand will be determined by multiplying the measured demand by 0.95 and dividing the results by the customer's average power factor. The average power factor is defined to be the quotient obtained by dividing the kWh used during the month by the square root of the sum of the squares of the kWh used and the lagging reactive kilovolt-ampere hours supplied during the same period. The customer's average power factor will be determined by means of permanently installed meters.

**DETERMINATION OF DEMAND:**

Measured demand is defined as the maximum rate at which energy is used for any period of fifteen consecutive minutes during the billing period. The billing demand shall be the greater of the measured demand for the billing period adjusted for power factor, or 50% of the ratcheted demand. The ratcheted demand is the maximum measured demand adjusted for power factor of four consecutive billing cycles during the most recent May through October billing periods depending on the billing cycle. Billing periods may not coincide with calendar months.

**MINIMUM BILL:**

The minimum bill shall not be less than the billing demand, as provided above, whether or not energy is used.

**PAYMENT:**

Payments are due on or before the due date.

**CONDITION OF DELIVERY:**

1. Service furnished under this rate schedule is subject to applicable provisions of RPU's published Electric Service Rules and Regulations.
2. Unless authorized by a separate written agreement, standby electric generating equipment installed by the customer shall not be interconnected or operated in parallel with the RPU system. Customer shall own, install, operate, and maintain electrical interlocking equipment, which will prevent parallel operation, and such equipment shall be approved by RPU prior to installation.
3. RPU shall not be liable for any damage or loss sustained by customers resulting from interruptions, deficiencies, or imperfections of service provided under this rate.
4. Energy furnished under this rate shall not be resold.

# MEDIUM GENERAL SERVICE HIGH EFFICIENCY -Closed

## AVAILABILITY:

At all locations for loads where the demand is at least 25 kW or more for three or more billing periods in a rolling 12-month period, but less than 10,000 kW, and where facilities of adequate capacity and suitable voltage are adjacent to the premises to be served, and to customers who:

1. Are currently on the Medium General Service High Efficiency HVAC rate as of January 1, 2022.
2. Use either an air source or ground source heat pump as the only source of heating and cooling in their facility.
3. Use an electric water heater (usually connected to a desuperheater on the heat pump) as the only source of water heating.
4. Receive prior approval of the equipment from RPU. Note that equipment must be rated by the Air-Conditioning, Heating, and Refrigeration Institute (AHRI)\* and at the time of installation, meet the minimum efficiency requirements found on the Commercial Heat Pumps Rebate Application in effect at the time. The current application is available on [RPU's website](#).
5. Service under this rate must be separately metered from other facility loads.

\*For air source and ground source heat pumps the efficiency ratings are determined using the Air-Conditioning, Heating and Refrigeration Institute's (AHRI) directory, which may be found on the [AHRI Directory](#).

Note: Other all-electric HVAC systems may be considered for this rate if they meet the stated efficiency standards. To have a system considered, customers must submit an engineering analysis documenting the efficiency of the system.

## APPLICATION:

To commercial, industrial, governmental, and other types of Medium General Service customers reconfiguring their current electric service, or adding a new service, to separately meter their high efficiency HVAC equipment. Not applicable to standby service.

## CHARACTER OF SERVICE:

Single or three phase 60 Hertz, alternating current at any one of the standard secondary service voltages as described in RPU's published Electric Service Rules and Regulations.

## RATE:

<b>RATE</b>	<b>2026</b>	<b>2027</b>
Demand Charges (kW) Non-Summer	\$18.44	\$19.35

<b>RATE</b>	<b>2026</b>	<b>2027</b>
Demand Charges (kW) Summer	\$23.06	\$24.19

<b>RATE</b>	<b>2026</b>	<b>2027</b>
Energy Charge (kWh) Non-Summer	\$0.05630	\$0.06024
Energy Charge (kWh) Summer	\$0.07009	\$0.07497

**DEFINITION OF SEASON:**

- Summer months are June through September.
- Non-summer months are January through May and October through December

**POWER COST ADJUSTMENT:**

Bills computed under this rate schedule are subject to adjustment in accordance with the Power Cost Adjustment (PCA).

**POWER FACTOR ADJUSTMENT:**

The customer agrees to maintain an average power factor of 0.95 or greater for the billing period and to prevent a leading power factor. If the customer's average power factor is less than 0.95 for the billing period, the billing demand will be determined by multiplying the measured demand by 0.95 and dividing the results by the customer's average power factor. The average power factor is defined to be the quotient obtained by dividing the kWh used during the month by the square root of the sum of the squares of the kWh used and the lagging reactive kilovolt-ampere hours supplied during the same period. The customer's average power factor will be determined by means of permanently installed meters.

**DETERMINATION OF DEMAND:**

Measured demand is defined as the maximum rate at which energy is used for any period of fifteen consecutive minutes during the billing period. The billing demand shall be the greater of the measured demand for the billing period adjusted for power factor, or 50% of the ratcheted demand. The ratcheted demand is the maximum measured demand adjusted for power factor of four consecutive billing cycles during the most recent May through October billing periods depending on the billing cycle. Billing periods may not coincide with calendar months.

For an existing facility reconfiguring its current electric service to come under this rate by separately metering its high efficiency HVAC equipment, the ratchet will be removed

from the current electric service. The ratchet will be effective beginning in October following the first separately metered high efficiency HVAC service during one of the May through October billing periods described above. At that time the ratchet will be reapplied to the current electric service and will be applied for the first time to the high-efficiency HVAC service.

**MINIMUM BILL:**

The minimum bill shall not be less than the billing demand, as provided above, whether or not energy is used.

**PAYMENT:**

Payments are due on or before the due date.

**CONDITIONS OF DELIVERY:**

1. Service under this rate is only for air-source or ground heat pumps and any other all electric HVAC systems that meet the stated efficiency requirements as explained in the Availability subhead of this rate schedule.
2. Service under this rate must be separately metered from other facility loads.
3. Since the HVAC system must be separately metered for this rate, the customer is responsible for any rewiring and its associated costs.
4. Service provided under this rate is subject to applicable provisions of RPU's published Electric Rules and Regulations.
5. Energy provided under this rate shall not be resold.
6. RPU shall not be liable for any damage or loss sustained by customers resulting from interruptions, deficiencies, or imperfections of service provided under this rate.
7. Unless authorized by a separate written agreement, standby electric generating equipment installed by the customer shall not be interconnected, or operated in parallel, with the RPU system. Customer shall own, install, operate, and maintain electrical interlocking equipment, which will prevent parallel operation, and such equipment shall be approved by RPU prior to installation.

# MEDIUM GENERAL SERVICE SECONDARY TIME-OF-USE

## AVAILABILITY:

At all locations for loads where the demand is at least 25 kW or more for three or more billing periods in a rolling 12-month period, but less than 10,000 kW, and where facilities of adequate capacity and suitable voltage are adjacent to the premises to be served. For loads where the service desired by the customer is not adjacent to the premises to be served, additional contract arrangements may be required prior to service being furnished. RPU reserves the right to limit both the number of customers and the amount of load taken under this rate schedule.

## APPLICATION:

To commercial, industrial, and governmental customers taking delivery at a voltage compliant with RPU's published Electric Rules and Regulations, with all service taken at one point under 13.8 kV, and measured through one meter, including both Single and Three phase voltage. Also applicable to temporary service in accordance with RPU's published Electric Service Rules and Regulations. Not applicable to standby service.

## CHARACTER OF SERVICE:

Single or three phase, 60 Hertz, alternating current at any one of the standard secondary service voltages as described in RPU's published Electric Service Rules and Regulations.

## RATE:

Meter Charge: Any additional meter charge for costs above RPU's standard MGS meter costs.

<b>RATE</b>	<b>2026</b>	<b>2027</b>
Non-Summer On-Peak Demand (kW)	\$19.93	\$20.91
Non- Summer Off-Peak Demand (kW)	\$2.16	\$2.26
Energy Charge (kWh)	\$0.06952	\$0.07437
Summer On-Peak Demand (kW)	\$26.88	\$28.02
Summer Off-Peak Demand (kW)	\$2.16	\$2.26
Energy Charge (kWh)	\$0.06952	\$0.07437

## DEFINITION OF SEASON:

- Summer months are June through September.

- Non-summer months are January through May and October through December

**DEFINITION OF ON-PEAK DEMAND:**

The maximum kW used by the customer in any fifteen-minute period between the hours of 10:00 a.m. and 10:00 p.m. Monday through Friday.

**DEFINITION OF OFF-PEAK:**

The maximum kW used by the customer in any fifteen-minute period during the off-peak period.

**OFF-PEAK HOLIDAYS:**

New Years, Memorial Day, Independence Day, Labor Day, Thanksgiving, and Christmas Day.

**POWER COST ADJUSTMENT:**

Bills computed under this rate schedule are subject to adjustment in accordance with the Power Cost Adjustment (PCA).

**POWER FACTOR ADJUSTMENT:**

The customer agrees to maintain an average power factor of 0.95 or greater for the billing period and to prevent a leading power factor. If the customer's average power factor is less than 0.95 for the billing period, the billing demand will be determined by multiplying the measured demand by 0.95 and dividing the results by the customer's average power factor. The average power factor is defined to be the quotient obtained by dividing the kWh used during the month by the square root of the sum of the squares of the kWh used and the lagging reactive kilovolt-ampere hours supplied during the same period. The customer's average power factor will be determined by means of permanently installed meters.

**DETERMINATION OF DEMAND:**

Measured demand is defined as the maximum rate at which energy is used for any period of fifteen consecutive minutes during the billing period.

**BILLING DEMAND:**

The On-Peak billing demand shall be the greater of the measured on-peak demand for the billing period adjusted for power factor, or 50% of the ratcheted On-Peak demand. The ratcheted On-Peak demand is the maximum measured On-Peak demand adjusted for power factor of four consecutive billing cycles during the most recent May through October billing periods depending on the billing cycle. Billing periods may not coincide with calendar months.

The Off-Peak billing demand shall be the measured Off-Peak demand for the billing

period adjusted for power factor less the On-Peak billing demand for the billing period.

The total billing demand shall be only On-Peak demand when On-Peak demand is higher than Off-Peak demand. When Off- Peak demand is higher than On-Peak demand, On-Peak demand will be billed in addition to the Off-Peak demand that exceeds On-Peak demand.

**MINIMUM BILL:**

The minimum bill shall not be less than the billing demand, as provided above, whether or not energy is used plus any meter charge.

**PAYMENT:**

Payments are due on or before the due date.

**CONDITIONS OF DELIVERY:**

1. Service under this rate will be made available at the option of the medium general service customer, subject to the availability of the necessary TOU metering equipment.
2. Customers converting to the MGS-TOU rate from the MGS rate shall make a one-time payment to RPU for any conversion cost above the normal cost to install MGS-TOU metering.
3. A customer may switch back to the MGS rate providing the customer gives RPU at least 60 days' notice and agrees to pay any metering conversion costs.
4. Service furnished under this rate schedule is subject to applicable provisions of RPU's published Electric Service Rules and Regulations.
5. Unless authorized by a separate written agreement, standby electric generating equipment installed by the customer shall not be interconnected or operated in parallel with the RPU system. Customer shall own, install, operate, and maintain electrical interlocking equipment, which will prevent parallel operation, and such equipment shall be approved by RPU prior to installation.
6. RPU shall not be liable for any damage or loss sustained by customers resulting from interruptions, deficiencies, or imperfections of service provided under this rate.
7. Energy furnished under this rate shall not be resold.

# LARGE GENERAL SERVICE PRIMARY

## AVAILABILITY:

At all locations for loads where the demand is at least 25 kW or more for three or more billing periods in a given in a rolling 12-month period, but less than 10,000 kW, and where facilities of adequate capacity and suitable voltage are adjacent to the premises to be served. For loads where the service desired by the customer is not adjacent to the premises to be served, additional contract arrangements may be required prior to service being furnished.

## APPLICATION:

To commercial, industrial, and governmental customers taking delivery at a voltage compliant with RPU's published Electric Rules and Regulations, with all service taken through one meter. The electric service shall be three-phase and the delivery voltage shall nominally be 13.8kV GRDY / 7.97kV. Also applicable to temporary service in accordance with RPU's published Electric Service Rules and Regulations. Not applicable to standby service.

## CHARACTER OF SERVICE:

Three phase, 60 Hertz, alternating current at any one of the standard primary service voltages as described in RPU's published Electric Service Rules and Regulations.

## RATE:

RATE	2026	2027
Demand Charge (kW)	\$22.51	\$22.95
Energy Charge (kWh)	\$0.06733	\$0.07202

## POWER COST ADJUSTMENT:

Bills computed under this rate schedule are subject to adjustment in accordance with the Power Cost Adjustment (PCA).

## POWER FACTOR ADJUSTMENT:

The customer agrees to maintain an average power factor of 0.95 or greater for the billing period and to prevent a leading power factor. If the customer's average power factor is less than 0.95 for the billing period, the billing demand will be determined by multiplying the measured demand by 0.95 and dividing the results by the customer's average power factor. The average power factor is defined to be the quotient obtained by dividing the kWh used during the month by the square root of the sum of the squares of the kWh used and the lagging reactive kilovolt-ampere hours supplied during the

same period. The customer's average power factor will be determined by means of permanently installed meters.

**PRIMARY METER DISCOUNT:**

Customers approved for metering at 13.8 kV will receive a discount of 1.25% on base rate charges for measured demand and energy.

**TRANSFORMER OWNERSHIP CREDIT:**

Customers owning transformers will receive a credit on each month's measured demand.

<b>Transformer Credit</b>	<b>2026</b>	<b>2027</b>
Credit per kW	\$0.50	\$0.50

**DETERMINATION OF DEMAND**

Measured demand is defined as the maximum rate at which energy is used for any period of fifteen consecutive minutes during the billing period. The billing demand shall be the greater of the measured demand for the billing period adjusted for power factor, or 50% of the ratcheted demand. The ratcheted demand is the maximum measured demand adjusted for power factor of four consecutive billing cycles during the most recent May through October billing periods depending on the billing cycle. Billing periods may not coincide with calendar months.

**MINIMUM BILL:**

The minimum bill shall not be less than the billing demand, as provided above, whether or not energy is used.

**PAYMENT:**

Payments are due on or before the due date.

**CONDITION OF DELIVERY:**

1. Service furnished under this rate schedule is subject to applicable provisions of RPU's published Electric Rules and Regulations.
2. Unless authorized by a separate written agreement, standby electric generating equipment installed by the customer shall not be interconnected or operated in parallel with the RPU system. Customer shall own, install, operate, and maintain electrical interlocking equipment, which will prevent parallel operation, and such equipment shall be approved by RPU prior to installation.
3. RPU shall not be liable for any damage or loss sustained by customers resulting from interruptions, deficiencies, or imperfections of service provided under this rate.
4. Energy furnished under this rate shall not be resold.

5. A separate electric service agreement may be required for service under this rate schedule.

# LARGE GENERAL SERVICE PRIMARY TIME-OF-USE

## AVAILABILITY:

At all locations for loads where the demand is at least 25 kW or more for three or more billing periods in a in a rolling 12-month period, but less than 10,000 kW, and where facilities of adequate capacity and suitable voltage are adjacent to the premises to be served. For loads where the service desired by the customer is not adjacent to the premises to be served, additional contract arrangements may be required prior to service being furnished.

## APPLICATION:

To commercial, industrial, and governmental customers taking delivery at a voltage compliant with RPU's published Electric Rules and Regulations, with all service taken through one meter. The electric service shall be three-phase and the delivery voltage shall nominally be 13.8 kV GRDY / 7.97 kV. Also applicable to temporary service in accordance with RPU's published Electric Service Rules and Regulations. Not applicable to standby service.

## CHARACTER OF SERVICE:

Three phase, 60 Hertz, alternating current at the Primary service voltage of 13.8 kV GRDY / 7.97 kV as described in RPU's published Electric Service Rules and Regulations.

## RATE:

Meter Charge: Any additional meter charge for costs above RPU's standard LGS meter costs.

<b>RATE</b>	<b>2026</b>	<b>2027</b>
Non-Summer On-Peak Demand (kW)	\$19.93	\$20.91
Non- Summer Off-Peak Demand (kW)	\$2.16	\$2.26
Energy Charge (kWh)	\$0.06952	\$0.07437
Summer On-Peak Demand (kW)	\$26.88	\$28.02
Summer Off-Peak Demand (kW)	\$2.16	\$2.26
Energy Charge (kWh)	\$0.06952	\$0.07437

## DEFINITION OF SEASON:

- Summer months are June through September.

- Non-summer months are January through May and October through December

**DEFINITION OF ON-PEAK DEMAND:**

The maximum kW used by the customer in any fifteen-minute period between the hours of 10:00 a.m. and 10:00 p.m. Monday through Friday.

**DEFINITION OF OFF-PEAK:**

The maximum kW used by the customer in any fifteen-minute period during the off-peak period.

**OFF-PEAK HOLIDAYS:**

New Years, Memorial Day, Independence Day, Labor Day, Thanksgiving, and Christmas Day.

**POWER COST ADJUSTMENT:**

Bills computed under this rate schedule are subject to adjustment in accordance with the Power Cost Adjustment (PCA).

**POWER FACTOR ADJUSTMENT:**

The customer agrees to maintain an average power factor of 0.95 or greater for the billing period and to prevent a leading power factor. If the customer's average power factor is less than 0.95 for the billing period, the billing demand will be determined by multiplying the measured demand by 0.95 and dividing the results by the customer's average power factor. The average power factor is defined to be the quotient obtained by dividing the kWh used during the month by the square root of the sum of the squares of the kWh used and the lagging reactive kilovolt-ampere hours supplied during the same period. The customer's average power factor will be determined by means of permanently installed meters.

**PRIMARY METER DISCOUNT:**

Customers approved for metering at 13.8 kV will receive a discount of 1.25% on base rate charges for measured demand and energy.

**TRANSFORMER OWNERSHIP CREDIT:**

Customers owning transformers will receive a credit on each month's measured demand.

<b>Transformer Credit</b>	<b>2026</b>	<b>2027</b>
Credit per kW	\$0.50	\$0.50

## **DETERMINATION OF DEMAND:**

Measured demand is defined as the maximum rate at which energy is used for any period of fifteen consecutive minutes during the billing period.

## **BILLING DEMAND:**

The On-Peak billing demand shall be the greater of the measured On-Peak demand for the billing period adjusted for power factor, or 50% of the ratcheted On-Peak demand. The ratcheted On-Peak demand is the maximum measured On-Peak demand adjusted for power factor of four consecutive billing cycles during the most recent May through October billing periods depending on the billing cycle. Billing periods may not coincide with calendar months.

The Off-Peak billing demand shall be the measured Off-Peak demand for the billing period adjusted for power factor less the On-Peak billing demand for the billing period.

The total billing demand shall be only On-Peak demand when On-Peak demand is higher than Off-Peak demand. When Off-Peak demand is higher than On-Peak demand, On-Peak demand will be billed in addition to the Off-Peak demand that exceeds On-Peak demand.

## **MINIMUM BILL:**

The minimum bill shall not be less than the billing demand, as provided above, whether or not energy is used plus any meter charge.

## **PAYMENT:**

Payments are due on or before the due date.

## **CONDITIONS OF DELIVERY:**

1. Service under this rate will be made available at the option of the large general service customer, subject to the availability of the necessary TOU metering equipment.
2. Customers converting to the LGS-TOU rate from the LGS rate shall make a one-time payment to RPU for any conversion cost above the normal cost to install LGS-TOU metering.
3. A customer may switch back to the LGS rate providing the customer gives RPU at least 60 days' notice and agrees to pay any metering conversion costs.
4. Service furnished under this rate schedule is subject to applicable provisions of RPU's published Electric Service Rules and Regulations.
5. Unless authorized by a separate written agreement, standby electric generating equipment installed by the customer shall not be interconnected or operated in parallel with the RPU system. Customer shall own, install, operate, and maintain

electrical interlocking equipment, which will prevent parallel operation, and such equipment shall be approved by RPU prior to installation.

6. RPU shall not be liable for any damage or loss sustained by customers resulting from interruptions, deficiencies, or imperfections of service provided under this rate.
7. Energy furnished under this rate shall not be resold.

# LARGE INDUSTRIAL SERVICE

## AVAILABILITY:

At all locations for loads with demand in excess of 10,000 kW for three or more billing periods in a rolling 12-month period, and where facilities of adequate capacity and voltage are adjacent to the premises to be served. For loads where the service desired by the customer is not adjacent to the premises to be served, contract arrangements may be required prior to service being furnished.

## APPLICATION:

To industrial customers with all service taken at one point and measured through one meter or meter totalizer. Not applicable to stand-by service.

## CHARACTER OF SERVICE:

Three phase, 60 Hertz alternating current at 13.8 kV GRDY / 7.97 kV.

## RATE:

RATE	2026	2027
Demand Charge (kW)	\$22.53	\$23.61
Energy Charge (kWh)	\$0.06100	\$0.06393

## POWER COST ADJUSTMENT:

Bills computed under this rate schedule are subject to adjustment in accordance with the Power Cost Adjustment (PCA).

## POWER FACTOR ADJUSTMENT:

The customer agrees to maintain an average power factor of 0.95 or greater for the billing period and to prevent a leading power factor. If the customer's average power factor is less than 0.95 for the billing period, the billing demand will be determined by multiplying the measured demand by 0.95 and dividing the results by the customer's average power factor. The average power factor is defined to be the quotient obtained by dividing the kWh used during the month by the square root of the sum of the squares of the kWh used and the lagging reactive kilovolt-ampere hours supplied during the same period. The customer's average power factor will be determined by means of permanently installed meters.

## DETERMINATION OF DEMAND

Measured demand is defined as the maximum rate at which energy is used for any period of fifteen consecutive minutes during the billing period. The billing demand shall be the greater of the measured demand for the billing period adjusted for power factor, or 50% of the ratcheted demand. The ratcheted demand is the

maximum measured demand adjusted for power factor of four consecutive billing cycles during the most recent May through October billing periods depending on the billing cycle. Billing periods may not coincide with calendar months.

**MINIMUM BILL:**

The minimum bill shall not be less than the billing demand, as provided above, whether or not energy is used.

**PAYMENT:**

Payments are due on or before the due date.

**CONDITION OF DELIVERY:**

1. Service furnished under this rate schedule is subject to applicable provisions of RPU's published Electric Rules and Regulations.
2. Unless authorized by a separate written agreement, standby electric generating equipment installed by the customer shall not be interconnected or operated in parallel with the RPU system. Customer shall own, install, operate, and maintain electrical interlocking equipment, which will prevent parallel operation, and such equipment shall be approved by RPU prior to installation.
3. RPU shall not be liable for any damage or loss sustained by customers resulting from interruptions, deficiencies, or imperfections of service provided under this rate.
4. Energy furnished under this rate shall not be resold.
5. Customer agrees to manage its utilization equipment so as not to unbalance the current per phase by more than 10%.
6. RPU may require a separate electric service agreement for service under this rate schedule.

# **INTERRUPTIBLE SERVICE – Closed**

## **AVAILABILITY:**

At all locations for customers who qualify and where facilities of adequate capacity and suitable voltage are adjacent to the premises to be served. Additional contractual arrangements may be required prior to service being furnished. RPU reserves the right to limit the amount of interruptible load taken by a customer and the total amount of interruptible load on the RPU system.

## **APPLICATION:**

To commercial, industrial, and governmental customers contracting for electrical service for a period of one (1) year or more and having an interruptible load with a measured demand of 100 kW or more.

The INTR interruptible rate schedule is used in conjunction with the MGS, LGS, and LIS firm power rate schedules. To qualify for the INTR rate schedule, customers must have a minimum of 100 kW of interruptible demand. RPU reserves the right to limit the amount of interruptible load, which may be nominated.

Customers who qualify for the INTR rate shall either nominate an interruptible demand amount or a firm demand amount. Customers nominating an interruptible demand amount shall be required to interrupt at least the amount nominated, or their total load if their total load is less than the amount nominated. Customers nominating a firm demand amount shall be required to interrupt an amount sufficient to bring their load to or below the firm demand nominated. In no case shall the INTR rate be made available to customers with less than 100 kW of interruptible load.

All interruptible loads recognized under the INTR rate schedule shall be electrical loads that are coincident with RPU's system peak. Customers' electrical loads occurring outside this peak period shall not qualify for the INTR rate schedule. Any generation equipment used by the customer to qualify for the INTR rate shall be located at the site of the interruptible load such that RPU does not have to use its electrical facilities to transmit power for the customer.

## **CHARACTER OF SERVICE:**

Three phase, 60 Hertz, alternating current at one of the standard secondary service voltages as described in RPU's published Electric Service Rules and Regulations. Service is subject to interruption at the sole discretion of RPU at any time during the year. There will be no more than 175 hours or 35 interruptions per year.

## **RATE:**

MGS, LGS, and LIS customers are billed for interruptible power at the following rates:

<b>Demand Charge per kW</b>	<b>2026</b>	<b>2027</b>
MGS	\$15.29	\$16.42

<b>Demand Charge per kW</b>	<b>2026</b>	<b>2027</b>
LGS	\$14.14	\$15.41
LIS	\$13.93	\$15.17

The Energy Charge per kWh shall be equal to the appropriate customer class energy rate defined in the rate tariffs for the MGS, LGS, and LIS customer classes.

**POWER COST ADJUSTMENT:**

Bills computed under this rate schedule are subject to adjustment in accordance with the Power Cost Adjustment.

**POWER FACTOR ADJUSTMENT:**

The customer agrees to maintain an average power factor of 0.95 or greater for the billing period and to prevent a leading power factor. If the customer's average power factor is less than 0.95 for the billing period, the billing demand will be determined by multiplying the measured demand by 0.95 and dividing the results by the customer's average power factor. The average power factor is defined to be the quotient obtained by dividing the kWh used during the month by the square root of the sum of the squares of the kWh used and the lagging reactive kilovolt-ampere hours supplied during the same period. The customer's average power factor will be determined by means of permanently installed meters.

**PRIMARY METER DISCOUNT:**

Customers approved for metering at 13.8 kV will receive a discount of 1.25% on base rate charges for measured demand and energy.

**TRANSFORMER OWNERSHIP CREDIT:**

Customers owning transformers will receive a credit on each month's measured demand.

<b>Transformer Credit</b>	<b>2026</b>	<b>2027</b>
Credit per kW	\$0.50	\$0.50

**SURCHARGE:**

Customers whose service is taken outside the Rochester City limits are subject to a 10% surcharge on their bills (excluding charges computed under the Power Cost Adjustment).

**PENALTY:**

Unauthorized use of electricity during a peak period of service interruption ordered by RPU will require the customer to pay a penalty (in addition to standard charges) which is reflective of the uninterrupted load's cost impact on RPU's wholesale power

cost from SMMPA over the ensuing 12 months:

- A. No impact - No penalty
- B. Occurs on monthly peak - Uninterrupted kW contribution to RPU's peak is billed at SMMPA rate.
- C. Occurs on annual peak (as determined by analysis from October 1 analysis of summer demands) - Uninterrupted kW contribution to RPU's annual peak is additionally penalized at two times SMMPA rate and added to participants October billing.

Exception for first-time participants in an RPU peak reduction rate who have interruptible nominations of less than 500KW: The penalty for failure to interrupt will be waived during the initial 24 months.

### **DETERMINATION OF DEMAND:**

Measured demand is defined as the maximum rate at which energy is used for any period of fifteen (15) consecutive minutes during the billing period.

### **BILLING DEMAND:**

Customers nominating an amount of interruptible demand are required to interrupt at least their nominated interruptible demand. Customers may interrupt demand greater than their nominated interruptible demand. The billed interruptible demand for the month shall be the hourly integrated demand interrupted during the peak period of a service interruption requested by RPU. This interruptible demand will be billed at the appropriate interruptible rate for that month. Where no RPU requested interruption occurs during the month, all demand above the nominated interruptible demand shall be billed at the firm demand rate under the appropriate MGS, LGS, or LIS firm rate schedule.

Customers nominating an amount of firm demand are required to interrupt all demand over their firm service level.

Customers may interrupt demand below the firm service level. When peak metered demand for the billing period is equal to or greater than the firm service level, the Firm Billing Demand shall be equal to the actual metered demand during the RPU-requested service interruption concurrent with the system peak for the billing period. When peak metered demand for the billing period is less than the firm service level, the Firm Billing Demand will be the greater of either the peak metered demand for the billing period minus the actual demand reduction during the RPU-requested service interruption concurrent with the RPU system peak for the billing period, or 50% of the Firm Demand Nomination for the most current June-September months minus the actual demand reduction during the RPU-requested service interruption concurrent with the RPU system peak for the billing period. All demand above the firm service level for the month shall be billed at the appropriate interruptible rate. Where no RPU requested interruption occurs during the month, all demand up to the

firm demand nomination shall be billed at the appropriate firm demand rate.

Both firm and interruptible billing demands shall be adjusted for power factor.

There is no ratchet provision for interruptible demand.

### **MINIMUM BILL:**

The minimum bill shall not be less than the adjusted billing demand, as provided above, whether or not energy is used.

### **PAYMENT:**

Payments are due on or before the due date.

### **CONDITIONS OF DELIVERY:**

1. Service furnished under this rate schedule is subject to applicable provisions of RPU's published Electric Service Rules and Regulations.
2. The Customer shall install, own, operate, and maintain the equipment necessary to interrupt its load.
3. In certain cases, the interruptible portion of the customer's load may have to be metered separately.
4. The Customer shall pay in advance of construction, all costs estimated by RPU for facilities located on Customer's premises which are necessary to serve the interruptible portion of the Customer's load and which duplicate other RPU facilities which are utilized to deliver electric service under other schedules. This includes any special metering needed for RPU to administer the INTR rate. Upon completion of the installation of such facilities by RPU, the actual cost of such facilities shall be charged to the Customer with the Customer's advance payment being applied as credit to such actual costs. The cost of major renewal and replacement of RPU-owned electric facilities located on the Customer's premises which are utilized for interruptible service and which duplicate other RPU facilities, shall be borne by the Customer.
5. When notified by RPU, the Customer shall remove the interruptible portion of its load from RPU's system in two (2) hours or less.
6. Upon one year's notice to the Customer, RPU may modify the hours and frequency of interruption specified herein to reflect changes in RPU's electric system load characteristics.
7. Interruptions of service caused by fire, accident, explosion, flood, strike, acts of God, or causes other than intentional interruptions ordered by RPU shall not be considered in determining the hours or frequency of interruption specified herein.
8. RPU, at its sole discretion, may immediately terminate service under this rate schedule upon the repeated unauthorized use of electricity by the customer during periods of interruption ordered by RPU.
9. Interruptible service shall not be used as standby for any other forms of energy or fuel.
10. Unless authorized by a separate written agreement, standby electric generating

equipment installed by the Customer shall not be interconnected or operated in parallel with the RPU system. Customer shall own, install, operate, and maintain electrical interlocking equipment, which will prevent parallel operation, and such equipment shall be approved by RPU prior to installation. RPU shall have the right to inspect the Customer's interrupting facilities as often as deemed prudent by RPU to verify their operating condition and proper interconnection.

11. RPU shall not be liable for any damage or loss sustained by Customers resulting from interruptions, deficiencies or imperfections of service provided under this rate.
12. Energy furnished under this rate shall not be resold.
13. Customers shall provide RPU with sufficient advance notice of their intention to use the INTR rate to allow RPU time to provide any necessary supplemental equipment and metering.
14. Customers using the INTR rate shall notify RPU in writing of their intention to use either the interruptible demand nomination or the firm demand nomination and the amount of their interruptible or firm loads.
15. Customers may change their method of nomination or level of nomination or both no more frequently than once per year with 60 days written notice and approval from RPU.

# POWER COST ADJUSTMENT

## APPLICATION:

Applicable to all rate schedules where there is a kWh charge.

1. The Power Cost Adjustment will be determined monthly, with application to the first revenue cycle each month.
2. The Power Cost Adjustment is determined by calculating the average actual cost per kWh of retail power supply from all sources and subtracting the Established Power Supply Cost. All calculations will be carried out to \$.00001 per kWh. Power supply costs include the cost of purchased power including charges for energy, demand, capacity, generation, transmission, cost adjustments, fees for regional power grid services, power supply revenues including capacity sales agreements of less than 5 years, and gross margin on wholesale generation sales.
3. The Established Power Supply Cost Base of \$0.07285 was determined by the 2014 cost of service study. The base will be adjusted as subsequent reviews identify a permanent and substantial change in the cost of power. The Power Supply Cost Base will be adjusted to retain the expected SMMPA rate adjustments for retirement of debt service and to retain the current average wholesale generation gross margin.
4. The Power Cost Adjustment will be the difference between the actual amount per kWh calculated in #2 above and the Established Power Supply Cost Base/kWh. This dollar amount per kWh will be added (subtracted) to each kWh of sales.

# CITY STREET LIGHTING

## AVAILABILITY:

To the City of Rochester for the illumination of public thoroughfares by means of RPU owned overhead street lighting facilities.

## RATE:

Per kWh for all kWh Billed	2026	2027
LED RPU Owned (All Sizes)	\$0.65176	\$0.69576
LED (All Sizes)	\$0.51568	\$0.56595

## POWER COST ADJUSTMENT:

Bills computed under this rate schedule are subject to adjustment in accordance with the Power Cost Adjustment (PCA).

## CONDITIONS OF DELIVERY:

1. This rate is based on lamps being lighted every night from approximately 30 minutes after sunset to 30 minutes before sunrise, providing dusk to dawn operation.
2. RPU will replace inoperative lamps and otherwise maintain luminaires during regular daytime hours. No credit will be allowed for periods during which the lamps are out of service. Routine lamp replacement will be made on a group replacement schedule.
3. RPU will determine the amount of energy used during any month by multiplying the rated kilowatt capacity of all lamps and accessory equipment by 350 hours for the month.
4. RPU shall not be liable for any damage or loss sustained by customers resulting from interruptions, deficiencies, or imperfections of service provided under this rate.

# TRAFFIC SIGNALS

## AVAILABILITY:

To governmental units for electric service to customer-owned traffic signal systems on public streets.

## RATE:

Monthly Fixed charge: per traffic signal control cabinet served:

<b>RATE</b>	<b>2026</b>	<b>2027</b>
Fixed Charge	\$38.07	\$39.77
Energy Charge (kWh)	\$0.11815	\$0.12348

## MINIMUM BILL:

The minimum bill is per traffic signal control cabinet served for any month or portion of a month.

<b>RATE</b>	<b>2026</b>	<b>2027</b>
Minimum Bill	\$38.07	\$39.77

## POWER COST ADJUSTMENT:

Bills computed under this rate schedule are subject to adjustment in accordance with the Power Cost Adjustment (PCA).

## CONDITIONS OF DELIVERY:

1. RPU shall not be liable for any damage or loss sustained by customer resulting from interruptions, deficiencies, or imperfections of service provided under this rate.

# SECURITY LIGHTING

## AVAILABILITY:

At all locations whenever the service can be provided with overhead wiring on an existing RPU owned pole.

## APPLICATION:

To all classes of customers contracting for security lighting.

## RATE:

Monthly Charge

<b>Mercury Vapor Lights (Closed)</b>	<b>2026</b>	<b>2027</b>
175-Watt	\$12.05	\$12.77
250-Watt	\$15.04	\$15.94
400-Watt	\$20.92	\$22.18

<b>High Pressure Sodium Vapor Lights (Closed)</b>	<b>2026</b>	<b>2027</b>
70-Watt	\$10.48	\$11.11
100-Watt	\$12.49	\$13.24
150-Watt	\$14.05	\$14.89
250-Watt	\$17.49	\$18.54
400-Watt	\$22.93	\$24.31

<b>Light Emitting Diode (LED) Lights</b>	<b>2026</b>	<b>2027</b>
LED Area Light	\$12.49	\$13.24
LED Roadway Lights	\$17.49	\$18.54

## PAYMENT:

Bills will be rendered monthly; payments are due on or before the due date.

## CONDITIONS OF DELIVERY:

1. RPU will furnish install, own, and maintain a standard lighting unit consisting of a luminaire, complete with lamp and control device wired for operation, supported by a bracket mounted on an RPU owned pole, and will supply all electrical energy necessary for the operation of the unit.
2. When RPU does not have a suitable pole or secondary service available at the desired location and it is necessary to install a transformer or a pole or to extend

secondary lines a distance greater than 150 feet, the customer shall pay RPU the actual costs for installing the transformer or pole and/or making such line extensions.

3. Service under this rate is not available underground or in underground areas unless the customer pays RPU the complete cost of the necessary underground facilities.
4. Lamps will automatically be switched on approximately 30 minutes after sunset and off 30 minutes before sunrise, providing dusk to dawn operation of approximately 4,200 hours per year.
5. RPU will make every attempt to replace inoperative lamps and maintain luminaries during regular daytime work hours within 3 working days after notification. No credit will be allowed for periods during which the lamp was out of service.
6. RPU will at the customer's expense, relocate or change the position of any lamp or pole as requested in writing by the customer.
7. Service furnished under this rate is subject to applicable provisions of RPU's published Electric Service Rules and Regulations.
8. RPU shall not be liable for any damage or loss sustained by customers resulting from interruptions, deficiencies, or imperfections of service provided under this rate.

## UNMETERED DEVICE RATE

### AVAILABILITY:

At all locations where facilities of adequate capacity and suitable voltage are adjacent to the location of the device to be served.

### APPLICATION:

To commercial customers where the estimated monthly kWh required does not exceed 300kWh and is determined by RPU to not warrant a meter.

### CHARACTER OF SERVICE:

Single of three phase, 60 Hertz, alternating current at any one of the standard secondary service voltages as described in RPU's published Electric Service Rules and Regulations.

### RATE:

<b>RATE</b>	<b>2026</b>	<b>2027</b>
Fixed Charge per Device per Month	\$12.65	\$13.41
Energy Charge (kWh)	\$0.12947	\$0.13724

### MINIMUM BILL:

The minimum bill is per device for any month or portion of a month.

<b>RATE</b>	<b>2026</b>	<b>2027</b>
Minimum Bill	\$12.65	\$13.41

### PAYMENT:

Bills will be rendered monthly; payments are due on or before the due date.

### CONDITIONS OF DELIVERY:

1. The customer shall furnish, install, own, operate, and maintain all devices. The customer shall also furnish, install, own, and maintain any structures required for the mounting and support of devices; except where the customer specifically requests and RPU agrees to use RPU owned poles for this purpose. In such cases, RPU will assist in the installation and removal of devices and the customer shall pay RPU for the actual costs thereof.
2. When RPU does not have secondary service available at the device location and it is necessary to install a transformer or to extend secondary lines a distance greater than 150 feet, the customer shall pay RPU the actual costs for installing the transformer and/or making such line extensions.
3. RPU will make the connection and disconnection with its distribution lines.

4. Loads other than the device shall not be connected to the device's circuit.
5. The customer shall furnish RPU with a map indicating the location of sirens to be operated and shall notify RPU at least 30 days in advance of the planned addition, removal, or relocation of any siren.
6. RPU shall not be liable for any damage or loss sustained by customers resulting from interruptions, deficiencies, or imperfections of service provided under this rate.

## **CLEAN AIR RIDER**

### **APPLICTION:**

The Clean Air Rider (CAR) will be used to recover costs related to renewable and environmental improvement programs and projects approved by the Utility Board. Applicable to all rate classes billed in kWh.

### **CONDITIONS OF DELIVERY:**

Emission Reduction Project at Silver Lake Plant

- a. The CAR for the Emission Reduction Project (ERP) at the Silver Lake Plant is to recover the annual debt service of the project.
- b. The CAR for the ERP will be calculated by dividing the ERP debt service requirements by the kWh forecast for all rate classes.
- c. The CAR will terminate for the ERP with payment of all debt service requirements.
- d. An annual true-up will be done comparing the actual amount collected to the actual debt service requirement. The amount over or under collected will adjust future years debt service requirements used in the calculation.

# COGENERATION AND SMALL POWER PRODUCTION TARIFF

## AVAILABILITY

By separate written agreement only.

## APPLICATION:

To residential and general service customers contracting for electric service for one year or more, with all service taken at one point and where part or all of the electrical requirements of the customer can be supplied by customer-owned electrical generating equipment which is connected for operation in parallel with RPU's system.

This rate schedule rider is to be applied in conjunction with the following schedules:

- Residential Service (RES)
- Residential TOU Service (RESTOU)
- General Service (GS)
- Medium General Service (MGS)
- Large General Service (LGS)
- Large Industrial Service (LIS)
- Power Cost Adjustment (PCA)

## CHARACTER OF SERVICE:

Single or three phase, 60 Hertz alternating current at any one of the standard secondary service voltages as described in RPU's published electric Service Rules and Regulations.

## RATE:

Demand Charge:

The demand charge shall be determined in accordance with the applicable rate schedule and shall be applied in accordance with the provisions of *Parts L, M and P of Rules Governing the Interconnection of Cogeneration and Small Power Production Facilities with Rochester Public Utilities*.

Energy Charge:

The energy charge shall be determined in accordance with the applicable rate schedule and shall be applied in accordance with the provisions *Parts L, M, N, O and P of Rules Governing the Interconnection of Cogeneration and Small Power Production Facilities with Rochester Public Utilities*.

Grid-Access Fee:

Effective January 1, 2026, and applicable to residential and general service distributed generation customers, with system size of less than 40kW AC that are not required to utilize avoided cost and not subject to the "buy all – sell all" provision in

the RPU Rules Governing the Interconnection of Cogeneration and Small Power Production Facilities with Rochester Public Utilities.

Minnesota Statute 216B.164 authorizes municipal utilities to charge a cost recovery fee on distributed generation facilities, enabling recovery of some of the cost shifts that occur between distributed generators and the rest of the utility customers. The monthly charge is applied per the nameplate kW AC of the installed inverter. If the DC nameplate rating of the array is less than the inverter AC rating, the applicable KW AC for billing purposes will be calculated proportionally based on the DC nameplate rating.

**RATE:**

<b>RATE</b>	<b>2026</b>	<b>2027</b>
Residential Monthly Charge per kW-AC	\$2.40	\$2.54
Small General Service Monthly Charge per kW-AC	\$2.31	\$2.45

**STANDBY CHARGE:**

The Standby charge shall be applicable to customers with new or repowered cogeneration facilities with a planned high- capacity factor. This charge will be based on the nameplate capacity of the generation facilities installed per kW AC. When standby service is required, energy and demand will be charged at the rate of the appropriate customer class. If a facility that is subject to a standby charge is offline for an extended period of time resulting in the customer being charged energy and demand at the appropriate customer class, the utility may adjust the standby charge at its sole discretion.

<b>RATE</b>	<b>2026</b>	<b>2027</b>
Monthly Cogeneration Standby Charge/kW AC	\$8.84	\$9.37

**MINIMUM CHARGE:**

The minimum charge shall be determined in accordance with the applicable rate schedule for each customer class.

**ENERGY AND CAPACITY CREDITS:**

The energy and capacity credits shall be calculated and approved in accordance with Part C of Rules Governing the Interconnection of Cogeneration and Small Power Production Facilities with Rochester Public Utilities and published annually as Schedule 1 and Schedule 2. The energy and capacity credits shall be applied in accordance with

the provisions of Parts L, M, N, O and P of Rules Governing the Interconnection of Cogeneration and Small Power Production Facilities with Rochester Public Utilities.

**POWER COST ADJUSTMENT:**

The energy credit computed under this rate schedule rider is subject to a Power Cost Adjustment.

**PAYMENT:**

Payments are due on or before the due date.

**CONDITION OF DELIVERY:**

1. Service furnished under this rate schedule rider is subject to applicable provisions of RPU's published Rules Governing the Interconnection of Cogeneration and Small Power Production Facilities with Rochester Public Utilities.
2. Service under this rate schedule rider will be furnished only to customers whose electrical generating capacity meet the requirements documented in Rules Governing the Interconnection of Cogeneration and Small Power Production Facilities with Rochester Public Utilities; such service may be limited at the sole discretion of RPU, to those customers who obtain "qualifying" status under FERC Regulations (18CFR Part 292) implementing section 201 of the Public Utility Regulatory Policies Act of 1978.
3. Service under this rate schedule rider will be furnished only after the customer and RPU have entered into a separate written agreement which specifies the type of metering and interconnection facilities to be employed, the responsibilities for installation, ownership, and maintenance of these facilities, and the procedures required for safe and technically acceptable operation of parallel electrical generating equipment.
4. RPU shall not be liable for any damage or loss sustained by customers resulting from the parallel operation of the customer's electrical generating equipment, or resulting from interruptions, deficiencies, or imperfections of service provided under this rate schedule rider.
5. Energy furnished under this rate schedule rider shall not be resold.

# ELECTRIC VEHICLE CHARGING TIME-OF-USE RATE

## AVAILABILITY:

Available to Residential Service Customers for service only to electric vehicle loads including battery charging and accessory usage. Customer must provide RPU approved documentation verifying possession through ownership or lease of an electric vehicle as defined in Section 169.011 subdivision 26a of Minnesota law. RPU reserves the right to limit both the number of customers and the amount of load taken under this rate schedule.

## APPLICATION:

To electric service required for Electric Vehicles in individual private dwellings and in individually metered apartments where such service is supplied at one point of delivery and measured through one meter with a second meter to measure EV-TOU consumption. Residential Customer Charge will be billed at the appropriate Residential rate for the first meter with an additional EV-TOU Customer Charge for the second meter. kWh usage measured through the second meter will be billed at the EV-TOU rate and excluded from the main meter's measurement of kWh.

## CHARACTER OF SERVICE:

Single phase, 60 Hertz, 120/240 volts alternating current.

## RATE:

<b>RATE</b>	<b>2026</b>	<b>2027</b>
Additional Customer Charge (for second meter)	\$9.04	\$9.65

<b>Energy Charge (kWh) Non-Summer</b>	<b>2026</b>	<b>2027</b>
On-Peak Energy (kWh)	\$0.20465	\$0.21869
Off-Peak Energy (kWh)	\$0.08295	\$0.08864

<b>Energy Charge (kWh) Summer</b>	<b>2026</b>	<b>2027</b>
On-Peak Energy (kWh)	\$0.28333	\$0.30276
Off-Peak Energy (kWh)	\$0.08295	\$0.08864

## DEFINITION OF SEASON:

- Summer months are June through September.
- Non-summer months are January through May and October through

December

**DEFINITION OF ON-PEAK ENERGY**

All energy used by the customer between the hours of 8:00 a.m. and 4:00 p.m. (8 hours) and between the hours of 8:00 p.m. and 10:00 p.m. (2 hours) Monday through Friday.

**DEFINITION OF OFF-PEAK ENERGY**

All energy used by the customer for all other hours, including weekends and holidays.

**OFF-PEAK HOLIDAYS:**

New Years, Memorial Day, Independence Day, Labor Day, Thanksgiving, and Christmas Day.

**POWER COST ADJUSTMENT:**

Bills computed under this rate schedule are subject to adjustment in accordance with the Power Cost Adjustment (PCA).

**MINIMUM BILL:**

<b>Minimum Bill</b>	<b>2026</b>	<b>2027</b>
Per Month (for second meter)	\$9.04	\$9.45

**PAYMENT:**

Payments are due on or before the due date.

**CONDITIONS OF DELIVERY:**

1. Service furnished under this rate schedule is subject to applicable provisions of RPU's published Electric Service Rules and Regulations.
2. RPU Shall not be liable for any damage or loss sustained by customers resulting from interruptions, deficiencies, or imperfections of service provided under this rate.
3. Energy furnished under this rate shall not be resold.
4. Service under this rate will be made available at the option of the residential service customer, subject to the availability of the necessary time-of-use metering equipment.
5. A customer may cancel participation in this rate providing the customer gives RPU at least 45 days' notice.
6. This tariff requires the use of metering technology capable of being read using automated equipment.

# LINE EXTENSIONS

## AVAILABILITY:

Available to all customers and developers in RPU's Service Territory.

## APPLICATION:

The Rules and rates for Line Extensions in this schedule apply to all existing and prospective customers requesting new line extensions or changes of existing service within subdivisions.

## RATE:

RATE	2026	2027
Residential Standard Service***	\$1,400	\$1,485

Commercial, Industrial, and Multi-Family Installed Transformer Capacity	2026	2027
Up to 25 kVA Standard Service*	\$1,680	\$1,780
25 kVA up to 10,000 kVA	Total cost of Standard Service less credit of \$63 per kVA of installed transformer capacity***	Total cost of Standard Service less credit of \$63 per kVA of installed transformer capacity***
Above 10,000 kVA and/or Non-Standard Service	Negotiated	Negotiated

\*Single Phase Service is assumed. If three phase service is requested, the customer must also pay the difference between three-phase and single-phase service. If the actual Line Extension cost exceeds \$5,000.00 per lot, the Line Extension charge will be negotiated.

\*\*In cases where the installed transformer credit offsets the total cost of the Standard Service, no additional amount will be charged.

\*\*\*For the purposes of this rate schedule, Standard Residential Service is considered to be a single lot or single structure with three or fewer dwelling units. If the actual Line Extension cost exceeds \$5,000.00 per lot, the Line Extension charge will be negotiated.

**PAYMENT:**

Payments must be received before work on the line extension or enhancement will begin.

## **ECONOMIC DEVELOPMENT CREDIT- Closed**

### **AVAILABILITY:**

To all qualifying commercial or industrial customers within the Rochester Public Utilities (RPU) Service Territory.

### **APPLICABILITY:**

Customers taking service under schedules MGS, MGS-HEF, MGS-TOU, LGS, or LIS that meet the following criteria may be eligible for an economic development energy credit:

- New commercial or industrial customers with a load of 250 kW or greater.
- Existing commercial or industrial customers with at least twelve months of billing history adding new incremental connected load of 250 kW or greater.
- Existing commercial or industrial customers in economic distress that have legitimate opportunities to move operations out of RPU's service territory with a total load across all facilities located within the RPU service territory of 1,000 kW.

### **QUALIFICATIONS:**

- The customer must have received no less than \$25,000 in local, county, State of Minnesota and/or federal financial assistance for economic development or economic stimulus.
- For load retention, the customer must have received \$50,000 in local, county, State of Minnesota and/or federal financial assistance for economic development assistance within the 24 months prior to applying for this rate.
- The customer must sign an affidavit attesting to the fact that "but for" the rate credits, either on their own or in combination with a package of economic development or job creation incentives from local, county, State of Minnesota, and/or federal programs the customer would not have located operations, added load or would have significantly reduced its energy consumption or shut down its facilities in the RPU service territory.
- The customer must meet all conditions set forth by the City of Rochester for economic development assistance.
- No credit is available to customers or potential commercial or industrial customers transferring load from a city that is a current member of the Southern Minnesota Municipal Power Agency.
- The customer must meet with RPU and review the energy efficiency program opportunities available prior to approval of the application for the credit.

### **QUALIFYING LOAD:**

New Load

- All electric load from the customer's new facilities served by RPU qualifies as new load.
- If a qualifying customer falls below the designated demand and/or energy consumption level, the customer will no longer qualify for any further credits

within the five-year term.

#### Incremental Load

- For incremental load, the , the base level of load is the customer's peak demand and energy consumption for the twelve months prior to adding the new load.
  - If the customer's energy consumption for a month in the current year exceeds the customer's energy consumption for the same month of the base year, the additional kilowatt-hours are incremental load that qualifies for the credit.
  - The customer need not have incremental energy use every month of the year, but at the end of each 12-month period the customer's entire twelve month energy use must exceed the base level and the customer must meet the minimum incremental peak demand requirements in at least one hour of the first twelve month period.
- If a qualifying customer falls below the designated demand and/or energy consumption level, the customer will no longer qualify for any further credits within the five-year term.

#### Load Retention

- RPU will designate how much load qualifies for the credit based on the facts and circumstances related to the customer.
- If a qualifying customer falls below the designated demand and/or energy consumption level, the customer will no longer qualify for any further credits within the five-year term.

### **CREDITS:**

The credit will apply to all qualifying new, incremental or retained load taken under applicable rate schedules. The Economic Development Rate Credit for customers beginning participation on or after March 1, 2021, shall be applied to the wholesale energy charge at a rate of:

- 40% of all qualifying energy charges in year one
- 20% of all qualifying energy charges in year two
- 10% of all qualifying energy charges in year three
- 5% of all qualifying energy charges in year four
- 2.5% of all qualifying energy charges in year five
- No credit beginning year six

The credit levels listed above will be in effect for the full five-year term for customers commencing participation on or before March 1, 2021.

Credits will be calculated and applied based on energy consumption in the current billing month.

### **MONTHLY FIXED CHARGE:**

A fixed charge of \$185.00 per month will be applied during the term of this rate to cover on-going administrative costs. The monthly fixed charge is subject to change annually based on RPU labor rate changes approved during the annual budget

process.

**TERM:**

Qualifying customers will be eligible for Economic Development Credits for a five-year period.

For new customers, the credits will begin on the first day of the first full month after a participating new customer begins taking service and meets the demand requirements.

For new load, the credits will begin on the first day of the first full month after the equipment driving incremental load is installed and meets the minimum incremental demand requirements.

For retained load, the credits will begin on the date specified by RPU.

**METERING:**

RPU reserves the right to impose a one-time charge on participating commercial or industrial customers for any new and/or additional metering infrastructure required to measure qualifying load and energy.

## MISCELLANEOUS FEES – ELECTRIC UTILITY

<b>Applicable to All Charges and Amounts Due on RPU Invoices</b>	<b>Fee Amount</b>
Not Sufficient Funds (NSF) Check	\$30.00

<b>Copies</b>	<b>Fee Amount</b>
Black and white, single side, per page	\$0.25
Black and white, duplex, per page	\$0.50
Color, single side, per page (from color printer, not copier)	\$0.35

House Move Investigation -	\$350.00
Infraview Service (per hour)	\$120.00

Commercial	\$15.95

# **SERVICE ASSURED® Utility Service Repair Coverage**

## **AVAILABILITY:**

Coverage is available to RPU residential Electric customers living in single-family homes, single-owner duplexes, and some townhome associations, individual twin homes, and triplexes where each has its own service line. Electric Service Assured® will be applied to all Electric Service customers effective January 1, 2025. Customers wishing to not receive Service Assured® protection may opt out by calling the RPU Service Center to request removal from the program. Customers may request to have their water service protected under the Water Service Assured® program without the Electric Service Assured® program, or in combination with the Electric Service Assured® program.

## **CONDITION OF SERVICE:**

Conditions of Service will be governed by the Service Assured® Terms and Conditions Agreement.

## **MONTHLY RATE:**

<b>Service</b>	<b>Fee Amount</b>
Water	\$1.99
Electric	\$1.99
Water and Electric	\$3.00

## **PAYMENT:**

Payments are due on or before the due date.

# WATER SERVICE

## AVAILABILITY:

At all locations within the Rochester City limits and at locations external to the City limits, that have been authorized by the Rochester Common Council.

## MONTHLY RATE:

Customer Charge

Size of Meter	2026	2027
5/8"	\$12.75	\$13.71
3/4"	\$16.65	\$17.90
1"	\$24.19	\$26.00
1-1 1/2"	\$43.44	\$46.70
2"	\$66.59	\$71.58

NOTE: Customers whose service is taken outside of Rochester city limits with individual water systems not connected to the City water system shall have a rate of 2.0 times the customer and commodity charges.

## MINIMUM BILL:

Applicable monthly customer charge according to size of meter provided.

## PAYMENT:

Payments are due on or before the due date

## **CONIDTIONS OF DELIVERY**

1. Service furnished under this rate schedule is subject to connection policies of the Rochester City Council.
2. Service furnished under this rate schedule is subject to provisions of RPU's Water Service Rules and Regulations.
3. RPU shall not be liable for damage or loss sustained by customers in conjunction with taking service under this rate.
4. Water furnished under this rate shall not be resold.
5. This tariff assumes use of metering technology capable of being read using automated equipment.

# **SERVICE ASSURED® Utility Service Repair Coverage**

## **AVAILABILITY:**

Coverage is available to RPU residential water customers living in single-family homes, single-owner duplexes, and some townhome associations, individual twin homes, and triplexes where each has its own service line. Water Service Assured® will be applied to all Water Service customers effective January 1, 2022. Customers wishing to not receive Service Assured® protection may opt out by calling the RPU Service Center to request removal from the program. Customers may request to have their electric service protected under the Electric Service Assured® program without the Water Service Assured® program, or in combination with the Water Service Assured® program.

## **CONDITION OF SERVICE:**

Conditions of Service will be governed by the Service Assured® Terms and Conditions Agreement.

## **MONTHLY RATE:**

<b>Service</b>	<b>Fee Amount</b>
Water	\$1.99
Electric	\$1.99
Water and Electric	\$3.00

## **PAYMENT:**

Payments are due on or before the due date.

## **FIRE HYDRANT FACILITIES CHARGE**

### **APPLICABILITY:**

To all residential and commercial and industrial water utility customers.

### **MONTHLY RATE:**

<b>Customer Class</b>	<b>2026</b>	<b>2027</b>
Residential	\$1.15	\$1.19
Commercial/Industrial	\$4.77	\$4.93

### **BILLINGS:**

Billings will be on a monthly basis.

### **PAYMENTS:**

Payments are due on or before the due date.

### **CONDITION OF DELIVERY:**

1. RPU shall not be liable for any damage or loss sustained by customer resulting from interruptions, deficiencies, or imperfections of service provided under this rate.
2. The rate will not be applied to water service meters that are used exclusively for irrigation purposes.
3. The rate will not be applied to water service meters that are not connected to the City's central water system.
4. The rate will be applied regardless of the property's water service status (active or non-active).
